¹ Although allowed under HIPAA, North Carolina law does not permit release of PHI outside of the Hospital unless required by law, pursuant to a court order or patient authorization, or for treatment, payment, or health care operations purposes as defined and limited by HIPAA. There is no exception for family members except for residents of a nursing home. The North Carolina physician-patient privilege statute, N.C.G.S. § 8-53, and HIPAA allow verbal authorization or consent for release, respectively, of information to family members. However, the better practice is to document the patient's consent in order to have clear evidence of the patient's intent. The package does not include a consent or authorization to release PHI to other providers or to insurance companies or others since most providers already have such forms. The contents of this form can be combined with such existing consent forms.
